

Come to Bassano for the Dominion Day Celebration, Monday, July 2nd, 1928

CHOLERA RAVAGES GEM HOG PENS

More Than Three Hundred Hogs Destroyed on Farm of C. Marquess

Hog cholera broke out in the Gem Colony this week. C. Marquess, one of the largest hog raisers in the district, lost 300 animals of all sizes when the hogs in his pens became infected with the disease. The animals were destroyed by Dr. B. E. Barlow and Dr. McDougall, veterinary surgeons, on Wednesday and Thursday when the sick hogs were found to have every symptom of cholera.

Dr. Barlow states that he is sure the disease is cholera, and believes the cholera germ was brought into the district by Chester White hogs imported from the United States. Mr. Marquess purchased three of these animals from the Central United States Swine Co., Incorporated.

Parts of Gem Colony are quarantined, and no hogs are permitted to leave the quarantined area.

Hog shipments to Calgary or elsewhere may be made under permit, or the owner ships at own risk.

Farmers who lose hogs through cholera do not suffer a total loss as the government allows some compensation.

Dr. Barlow states that hog cholera is not contracted by other animals, nor by human beings.

Financial Statement Of Husar Stampede

Following is a list of receipts and expenditures in connection with the Husar Stampede held July 24th.

Receipts	
Gate	\$1,432.19
Carnival	794.26
Dance	607.75
Total	\$2,834.20
Disbursements	
Prize money paid out	\$ 639.28
Labor (moving corral, etc.)	156.40
Carnival novelties	254.67
Express	19.38
Janitor	30.94
Driving	26.00
Orchestra	60.00
Dr. M. D. Millard	50.00
Mr. Owens, paid	292.67
Sam Swain (feed acct.)	152.77
Cattle & horses	122.57
Bal. on furnace	273.00
Rent of grounds	100.00
Fuel for park	152.50
Band expenses	12.95
Children's sports	34.87
Bal. on Delco plant	225.00
Printing	42.00
Frank Wolfe	100.00
Lumber	160.00
Judge	15.00
Total Disbursements	\$2,962.52

This will leave a balance owing on the hall of only a thousand dollars.

Hussar News

HUSSAR, June 27.—On Sunday there was an interesting baseball game, although the rain prevented the game that had been planned. Seven of the Edmonton C. boys were stranded here, so the young men of Hussar got a team and played them, with the score of 3 to 4 in favor of the C. boys.

Mr. and Mrs. C. T. Armstrong took their children to Calgary over the week-end.

About twenty-two members and friends attended the meeting of the Ladies' Aid at the home of Mrs. M. D. Moffat on Thursday. Much business was discussed, and a short program rendered. Mrs. Benson delighted the ladies with a beautiful piano solo. Mrs. Nelson read a very interesting selection, entitled, "Home." Mrs. Burdett was appointed to take the place of Mrs. Nelson on the flower committee, as Mrs. Nelson is about to move out to the farm for the summer. A most delicious luncheon was served.

A few rainfalls have dried up the roads wonderfully, and they have been draped, so are in good condition again. The improvement in garden and field crops is very noticeable.

The school-orchestra are busy writing examinations, but they expect to have a picnic on Friday, a holy clove of a successful year.

Fifty Dale school expect to close school on Friday with a picnic.

Mrs. Piner and Miss Kyle plan to leave for the coast on Saturday to spend their vacation at home.

Mrs. Moffat, Eleanor, Johnnie, Lauren, Anna, Margaret, with Fran and Mrs. Anderson, and Chester, were Bassano visitors on Tuesday.

Mrs. Hall is visiting her daughter, Mrs. Kuchel.

Owing to a conflict in dates, it has been decided to postpone the meeting of the W. I. set for July 10th, to July 17th, and it will be held at the same place.

The next meeting of the Ladies' Aid will be held at the home of Mrs. Moffat on Thursday, July 26th. All members and friends are invited to be present.

It is expected that the dance given by the Hussar orchestra on Friday the 29th, will be well attended, as there has been no dance here recently, and school will have just closed.

The members of the Hussar orchestra had a very trying trip to Meadowbrook last Friday, as it rained almost all night.

Harry Powers, eyeglass specialist, will be in Hussar Friday, July 6th.

CHAPELQUA COMING

TO BASSANO TOO

Chapelqua is coming to Bassano for two evening performances. The programs will be presented in the New Masonic Community Hall, and there will be a different program on each night.

The dates will be announced later.

Mel Cowie, of Calgary

Tommy Rogers and Nelson Ferguson of Calgary

Matched for Semi Final

Cowie and Gore

Fight Here July 2

The fight for the featherweight championship of Western Canada will take place in Bassano on the evening of the Dominion Day holiday, Monday, July 2nd, when Mel Cowie, of Calgary, will defend his title against Silver Gore, of Swatara. The fight will be for ten 3-minute rounds, and will be staged in the New Masonic Community Hall.

The list of children's sports and stampede events is as follows:

1. 50 yards dash, under 10 years.

2. 50 yards dash, under 12 years.

3. 50 yards dash, under 16 years.

12. 4 to a team, 5, 2, 1

13. Slow race, whip and spur, 10, 5, 2, 1

14. High jump, 20, 10, 5

EVERYTHING READY FOR STAMPEDE JULY 2

Children's Sports, Stampede, Athletic Events, Carnival, Boxing, Card, Dance, etc., Interesting Variety of Program for July 2nd

Dominion Day will be celebrated in true western fashion in Bassano on Monday, July 2nd, when a varied program of children's sports, stampede, athletic events, carnival, boxing, and dance, will constitute the day's entertainment for the large crowd of people who will flock to Bassano for the annual celebration.

Everything is in readiness for the big day. The program is complete, the bucking and stamper horses are on the way, the carnival equipment is on hand, arrangements for the most of the day's program are completed, and now all that is needed to assure a successful day is fine weather. And from all indications fine weather it will be.

The Carnival

One of the most attractive features of the day will be the carnival. This year there will be many of the old games and also many new ones, and the carnival booths should attract large crowds. There will be ten booths in operation, and the games will be in the afternoon, and fourteen down town at night. The street from Flanagan's hardware to the post office will be closed on the evening, and the carnival booths erected directly in front of the Masonic Community Hall where the dance will be held.

Those who enjoy the graceful game may dance to their heart's content in the large Masonic Community Hall at night. The floor is in splendid condition, and the newest and best dance music will be played by the Bassano Harmony Orchestra.

Sports Program

The list of children's sports and stampede events is as follows:

1. 50 yards dash, under 10 years.

2. 50 yards dash, under 12 years.

3. 50 yards dash, under 16 years.

4. 100 yards dash, under 16 years.

5. 100 yards dash, open to school children and subject to handicap.

6. Running broad jump, under 12.

7. Hop, step and jump, under 14.

8. High jump, open to school boys.

9. Relay race, public school boys, 4 to a team.

10. Relay race, open, 4 to a team.

11. Potato race, open, 15 years.

12. Boys' and girls' events will be run concurrently.

Stampede & Athletic Events

1st 2nd 3rd

1. Bucking with saddle, 100 lbs.

2. 100 yards dash, open, 5, 2, 1

3. 50 yards dash, open, 5, 2, 1

4. Bareback with surcingle, 20, 10, 5

5. Best bucking horse, 20, 10, 5

6. 200 yards dash, open, 5, 2, 1

7. Relay race, open, 10, 5, 2, 1

8. Riding yearling colts, 20, 10, 5

9. Hop, step & jump, 5, 2, 1

10. Relay race (horses), 25, 15, 10

11. Relay race (men's) mile, 5, 2, 1

12. 4 to a team, 5, 2, 1

13. Slow race, whip and spur, 10, 5, 2, 1

14. High jump, 20, 10, 5

15. Potato race, open, 15 years.

16. Boys' and girls' events will be run concurrently.

Gem News

GERM, June 27.—Wednesday, July 18th, is the date for the Gem Stampede. It was first planned to hold the celebration July 20th, but the date was changed to the 18th. The program has been drawn up, and the posters are now being distributed.

"Sunday last Mr. Hagger, the new Imperial Oil agent at Bassano, was visiting in the Colony.

Mrs. Fred Williams is a patient in the Hospital, going in early in the evening.

C. Marquess lost more than 300 hogs with cholera this week. The animals had to be destroyed.

Short Fryberger is visiting in the Colony this week. Mr. and Mrs. W. Parrott, of Charlott, Montana, are also visiting in the Colony.

A U. F. A. meeting was held last Saturday evening, and there was some discussion re the Wheat Pool.

The baby son of Mr. and Mrs. Schreiner was in the Bassano Hospital for a few days, and was brought home Saturday.

A dance will be held in the Gem Colony Friday evening this week, June 28th.

Misses Lucille Pollock, Mildred Ferguson, and Margaret Douglas, grade 10 and 11 pupils, were in Bassano this week writing their exams.

Miss McLean is now employed as stenographer in the Royal Bank at Bassano.

Dr. B. E. Barlow and Dr. McDougall visited in the Colony this week in connection with the cholera epidemic.

Mr. Galbraith, of Brooks, C. P. R. D. N. R. official, was in the Colony on business last week.

J. Henry, of Calgary, was in the Colony on business last week.

A. McKee, of Calgary, was in the Colony on business last week.

J. S. Stinson, of Calgary, was in the Colony on business last week.

SWIMMING POOL NEARS COMPLETION

May Not Be Open for Dominion Day Holiday, July 2nd

Owing to unforeseen and unavoidable delays in the building of the Bassano swimming pool it is now not expected that it will be completed in time for the Dominion Day holiday, next Monday, July 2nd, as previously planned.

The walls are completed, and the banking against the walls is now being filled, it is hoped to settle, but the floor has yet to be laid and the dressing rooms built.

Water was turned into the pool early this week in order to assist in making the earth filling behind the walls.

The committee in charge has not yet decided to permit use of the pool, but it is expected that there will be no problem.

The call for funds has met with a generous response from the people. The following is a complete list to the committee in charge, and there will be other contributions:

B. M. Butterworth \$2.00

P. Murphy 2.00

"And now," said his bored friend, "you talk to cure."

MANY DISTRICTS TO SHOW EXHIBITS

Exhibits from a large number of districts throughout the province are to be shown this year at both the Calgary and Edmonton exhibitions. As a result of the keen interest shown in these district exhibits, the number of locations, represented in this way will be considerably increased in 1925.

In judging the exhibits, points will be awarded for the best display of fruits, flowers, vegetables, roots, dressed and sheaf grain, fowl, crops, honey, and other agricultural

products and for the attractiveness with which the exhibit is arranged. A handsome bronze shield is offered by the department of agriculture for the highest scoring district exhibit at each of the exhibitions, and the shield to be won three times before becoming the permanent property of the district.

DOMINION DAY

Sunday, July 1st, is the birthday anniversary of the Dominion of Canada. Looking back over the years since that memorable gathering of the Fathers of Confederation, Canadians can view with pride the progress their country has made.

The Dominion of Canada is but sixty-one years old, but during that sixty-one years she has developed from a group of detached provinces into one great federation of united people, and she takes her place among the world of nations.

But the progress of Canada during the past sixty-one years is only a fraction of the development that will take place within the next three more years. This is Canada's century. The people in practically every Christian country in the world have their eyes on Canada, and she is already beginning to experience a fraction of the agricultural and industrial development which will be hers in years to come. With only a small portion of her agricultural lands under cultivation she is already the greatest wheat exporting country in the world; her mineral wealth of immense proportions is being developed, and almost every day new discoveries of minerals are being made that give only a slight indication of the great wealth that is hidden below the surface of the earth; vast timber tracts are available for the lumber and paper industries; and there is room in this wide Dominion for ten times the present population.

With her great natural wealth and a united people of great moral strength and integrity, Canada is bound to become one of the greatest nations in the world of tomorrow.

THAT HOSPITAL ADDITION

The Bassano Hospital Board is still waiting for permission from the provincial Department of Health to build an addition to the local hospital building.

There has been a great amount of delay in this matter. The local hospital board has been trying for two years to get the sanction of the provincial department. They expect to get some action on it very soon, however, for the problem is now before the sanitation authorities, and it is believed that permission will be granted.

The Hanna Municipal Hospital was recently given permission to enlarge their hospital with an addition costing \$22,000. To do this the Hanna Hospital will have to borrow the money.

The Bassano Municipal Hospital is more fortunately situated. They have the money in the bank. The expenditure will be considerably less than that proposed at Hanna. The need for enlarging the Bassano Hospital is most necessary. Surely under these conditions the

department of health cannot refuse permission to provide increased accommodations for patients at the Bassano Hospital.

Two poems from "Children," the magazine for parents, New York, touch the principle of parenthood from very different angles, but, nevertheless, poignantly.

TO ANY CHILD
Clear-eyed and grave you look me through and through
And know me as I am, not as I seem.

The masks I wear may cheat the world, not you.
What I have done the coldy-wis may deem
Noble or paltry, weighing good and ill;
Buyers and sellers! Let them mete and dale,
Appraising gains and losses as they will.

But, all unconsciously, you see the soul.
Can you believe in me, in me who must be humbly schooled by you before I reach
You smile the smile of childhood's perfect trust:
I am not all unworthy? May I reach
Again the stainless peaks of April's prime?

But your small hand in mine and help me climb.

PALS

When I see a boy who hasn't a dog.
Or a dog that hasn't a boy—
I think of the lot they are missing
Of frolic and genuine joy.

Some parents think dogs are a nuisance.
Just something to bark and annoy.
They can't know how badly a boy needs a dog
Or how sadly a dog needs a boy.

CHAMPION CARS

43% more Studebaker Dealers this year in the Dominion

THE swing toward Studebaker is the inevitable result of adding spectacular performance to One-Price value—and then proving the stamina and speed of the cars by severe tests under official supervision.

All official records for fully equipped stock cars are now held by Studebaker. Never before has one manufacturer thus swept the boards.

When such performance can be bought at Studebaker's remarkable One-Price prices, why be content with less than a champion?

Studebaker's sensational proofs of speed and endurance come from engineering genius, quality materials, precision manufacture and rigid inspections. Because of these, any Studebaker may safely be driven 40 miles an hour the day you buy it.

Today in Studebaker and in Studebaker alone, you can buy the utmost in every phase of motoring—and behind it a name which for 70 years has meant dependable transportation. Come in, and drive a champion!

THE CALGARY STAMPEDES

Calgary has become famous all over the world for its great annual celebration, the Calgary Exhibition and Stampede. As indication of its success is in the following attendance figures, 1922, 97,237; 1923, 137,834; 1924, 147,379; 1925, 175,683; 1926, 187,471; 1927, 220,573.

The Calgary Exhibition is the show window of western Canada where a magnificent display of live stock, government, agricultural, industrial and domestic exhibits may be seen.

This year the combined celebration will be held July 24 to 31st, when the Rexnolds, Vincent Willingdon governor-general of Canada and Lady Willingdon will be present and participate in many events during the week.

To provide for the tremendous crowds expected this year, a large addition is being made to the grandstand, which gives Calgary the second largest seating capacity of any exhibition in Canada. An extensive addition is also being made to the cattle pavilion.

The stampede events will be especially thrilling. The exhibition has now a herd of seventy Brahmas stags for the steer roping, and the steer riding contests, and with the top bucking horses purchased and others already arranged for, the best stock ever used at the stampede is assured. There will be from fifteen to eighteen chuck wagons in the chuck wagon race contests, and stockmen are coming from all over western Canada and the Western States.

There will be special reduced fares from Saskatchewan, Alberta, and British Columbia mountain points. Summer tourist rates from wherever you may live to the Calgary exhibition and stampede, to the heart of the Canadian Rockies.

Calgary has up-to-date automobile camps and the main highway from the international boundary and from Calgary to Edmonton as well as from Calgary west to the mountains, is all gravelled. The Banff-Windermere Highway is one of the "most beautiful motor roads in the world, and as Calgary is only three hours auto drive from Banff, this provides a splendid opportunity to enjoy a mountain holiday after the dates of the Calgary exhibition and stampede.

CARE OF THE CHICKS ON RANGE

(Experimental Farms Note)

The simpler the methods of feeding and caring for the chicks, the better can be adopted the better.

Feeding tests at the Central Experimental Farm have shown equally as good results from hopper feeding as when the chicks were fed at regular intervals, five or six times a day. When the moulting period is past and the chicks are old enough to go without heat they should be given roasts and as soon as they become used to them they should be put out on range.

For range a light, sandy soil is best. If a field of alfalfa is available on the one hand and a corn field on the other, the conditions are ideal.

Do not overcrowd; use airy, well ventilated houses, a mere shelter, a roof with walls covered with wire netting is here found excellent.

Shift the houses and feed hoppers frequently so that the ground where the chicks spend most of their time does not become contaminated.

Keep a supply of pure water, hoppers of growing mash, crimped oats, grit and oyster shell before the flock at all times. Give a full feed of grain in the evening; this is fed either by hand or kept in hoppers which can be opened for a while in the evening and closed through the day.

Chicks kept as described will be raised under ideal conditions with the minimum amount of labor.

CAR FOR EVERY NINE PERSONS IN ALBERTA

Alberta has 118 passenger automobiles per hundred of population or approximately one car to every nine men, women and children in the province, according to figures furnished from Ottawa during the past week. In this respect Alberta stands fourth among the provinces of the Dominion, Ontario leading with 131.1 per hundred of population, and Saskatchewan and British Columbia following with 111.1 per hundred. Corresponding figures for the other provinces are: New Brunswick, 54; Nova Scotia, 43; Prince Edward Island, 47; and Quebec, 35.

Man in restaurant: "Give me a steak and some prohibition bun." Waitress: "I'm sorry, but we haven't any prohibition bun." Man: "Yes, I have. I got some dry as a bone here the other night."

CALGARY & LETHBRIDGE

POPULAR C.P.R. OFFICIAL

EROMOTED

J. M. Cameron, who for the past thirteen years has held the post of general superintendent of the Calgary division of the Canadian Pacific Railway, has been promoted to the position of manager of C.P.R. lines at Vancouver. It is announced by vice president D. C. Coleman. The appointment will take effect on July 1st, when Mr. Cameron will take up his headquarters at Victoria, succeeding R. Beasley, who is retiring after 41 years service with the company.

Husband, (seeing wife off in the train)—"Now, dear, just as soon as you drive you home, telegraph."

Wife: "Ah right. How much will I telegraph for?"

"I can't tell good made from the radio."

"There are a lot of folks like you," said little Ashby, brightly, "only they don't know it."

"Right: 'I'll give him credit for getting me a nice engagement ring."

Ruby: "I expect that's what the jeweler gave him, too."

NASH presents a New and Finer Motor Car

New Twin Ignition Motor New Salon Bodies

"The three new Nash Series, which are being introduced everywhere today, achieve the ambition of my manufacturing career."

"They represent an entirely new type of motor car, priced moderately, but offering you all the beauty and quality and performance heretofore exclusive to very expensive automobiles."

"To create such a car we had to develop an entirely new type of design and invest over \$2,500,000 in dies and machinery alone."

"Both the Salon bodies and the high compression motors which power these new models exemplify the most radically modern advancement in body craftsmanship and engineering."

"Naturally space precludes the full listing of all features but I do want to draw your attention to a number of the outstanding attractions such as—"

"Twin ignition, high compression, Bohnalite aluminum alloy pistons

with Invar-struts, 7-bearing crankshaft with hollowed crankpins, Bijur centralized chassis lubrication, Houdaille and Lorejoy shock absorbers, Biflex-Nash bumpers and bumperettes, chrome plating over nickel for all exterior metal ware, double-drop frame, one-piece fenders and longer wheelbase length."

"This new type engineering of the '400' motors makes them by far the best performing cars I have ever built."

"I don't think anyone will ever want to use all the speed and power they deliver."

"Equipment is absolutely complete at the factory list price and you need buy no extras except a spare tire."

"If my judgment is worth anything you will find it well worth while today to examine this new automobile development with the greatest care."

C. W. Nash

President, The Nash Motors Company

ROY SMITH, Bassano, Alberta

In Old Quebec

Quaint Part Of Dominion Where Modern Commerce And Ancient Customs Meet

On the banks of the St. Lawrence, one of the largest of the tributaries of the St. Lawrence, is a busy modern town whose past history and present commerce link Canada and the United States. It is the town of Quebec, which gave its name to a new map sheet of the National Topographical Survey of the Department of the Interior on a scale of one mile to "the inch."

Sorel, now noted for its shipbuilding yards, was for a long time the summer residence of the Governor of Canada. Here too stood old Fort Richelieu, now commemorated by a cairn, tablet, and fence. This fort, first raised in 1665, was rebuilt of stone in 1665 by Captain Pierre de La Roche, a French engineer, under orders from the Marquis de La Roche. Leading to it was the waterway from the English colonies on the Atlantic seaboard by way of the Richelieu River, Lake Champlain and the Hudson River. In those early days it was the favorite warpath of the Iroquois. Now it is the highway for the export to the United States of bay grown on the low lying marshy islands of the St. Lawrence in front of Sorel, and also of pulp wood.

The Sorel map sheet is pleasing to the eye, and its features are sharply defined in various colors. The river of the north and south shores Montreal-Quebec highways shown on the map in red are cut out by secondary thoroughfares shown in blue. Many of these lead northward into the Laurentides. These are the well-known paths of the explorer, the hunter and the fisherman. Good local roads outlined in black cross the country in every direction. Bordering them are the uniformly ribbon-like farms of Quebec. White-washed dwellings and outbuildings which are also shown on the map lend picturesque to an otherwise rather flat landscape, occasionally relieved by patches of heavy woods and timber wooded areas.

The town of Berthier across the St. Lawrence from Sorel is part of an old seigniorie granted to the Marquis de Ranville on the 25th of October, 1672, and from him acquired by Alexandre Berthier, an officer of the Carignan regiment. A relic of seigniorial times survives in the Commune de Berthier on lake au Quatre where the people still claim pasture privilege for their stock. Partly in ruins, but still standing on the Berthier seigniorie, is one of the oldest Protestant Churches in the province. A forest nursery, in connection with which is a forest ranger's school, is located in the vicinity of the town.

Famed for having the largest timber factory in the world, Joliette is situated on the Riviere L'Assomption. The city was named after the Marquis Louis Joliette. Commercially it is also important as a manufacturing centre for tobacco, paper and lumber.

Along the St. Lawrence here and there are stone houses with thatched roofs, while nestling villages grow around a church and rectory, away from the scenery inland.

The Sorel sheet is obtained from the Surveyor General, Department of the Interior, Ottawa, upon application and payment of twenty-five cents. The map may also be had on linen back or in folio cover in either English or French for fifty cents.

Indignant Householder (holding up a dead cat): Here, respectable, look what I found in my garden. What are you going to do about it?

Constable Well, you know the law. If it ain't chimbley in three months, it's yours!

Baldheaded Man—"Give me a shampoo."

Barber—"Sorry, but I'm just out of facial soap air."

Balaia gum from the milky juice of the balata tree is used in making rubber billings.

My husband only married me for my money.

"Then he is not so stupid as he looks."—Flegende Blatter, Munich.

W. N. U. 1736

Canadian Beaver For New Zealand

Specimens From British Columbia Sent To Sister Dominion

So that the young New Zealanders may get a better idea of their sister Dominion Canada, the federal government has just shipped from Jasper to Auckland two live beaver.

They were taken from the river in Calendar Creek and so that they should not become domestic given special accommodation on the train and steamer.

Two other beaver who have just left on a long steam voyage were taken out of the Malheur range dome and shipped to Edinburgh, Scotland.

The latter pair were removed from a colony of 40 which live in a creek five miles long in eight lodges. The creek, which spouts out of a rock close to the Malheur River, empties into the Athabasca near Henry House.

Two fine specimens of mountain sheep, both males and now in Edinburgh mounted for the Victoria Memorial Museum, Ottawa, and sheep and goat heads are being prepared for the Canadian Embassy at Washington. They are all very fine specimens, shot by the park wardens for the purpose.

The World's First Piano

Supposed To Be Invention Of Italian In 1700

The bi-centenary of Brissacensis recalls the invention of the piano, the credit of which is claimed for a number of folk of different nationalities. A strong claim has been made by Francesco Antonio Martin, in Paris, in 1716, and the Germans give the credit to Christopher Schroter, who in 1717, while only 18, constructed the piano which was certainly an advance on earlier instruments. The weight of evidence, however, ascribes the invention to a matter of good fortune. Christopher, who solved the problem of fitting hammers to a harpsichord in 1700.

Aviation and Conservation

Aerial Transport Helping To Solve Many Urgent Problems

Each year aviation is playing a greater part in the development and conservation of the natural resources of Canada. Aerial transport is helping to solve the most urgent problems of the forest, surveyor, geologist, and explorer in their work in the more remote and unexplored parts of the country as well as in the settled districts, and the application of aerial methods to other lines of research are constantly enlarging the field of usefulness of the airplane.

This year's program of the Royal Canadian Air Force in civil operations for Canadian Government Departments included work for the Forestry Service, Topographic Survey, National Parks, Water-power and Reclamation Service and in a variety of activities for most of the departments.

Growing Garden Tomatoes

A Single Stem, Staked Up, Is Best Method For The Small Gardener

The growing of tomato plants to a single stem, staked up, is becoming more and more popular for the small garden. In a test at the Kenilworth, Nova Scotia, Experimental Station twenty-five plants of each of the varieties Alacritty and Bonny Best, were planted in rows four feet apart. The plants were set out, eighteen inches apart and tied to stakes, and six plants of each were planted four feet apart in a row and left untied. It was found that these groups to a single stem and tied to a stake gave earlier fruit, and on September 20, had produced the highest yield of mature fruit. The bush grown plants on the other hand gave the highest total yield of ripe and green fruit with fewer cracked fruit.

No Climate At All

Hotel Porter (expecting tip): "Hope you'll have a comfortable journey, sir."

Scott—"Veris sorry, but I've given no man's change, so the chance bermal."

Porter—"She told me you didn't give her anything."

Scott—"A' well, if I didna give you bonnie little anything, what sort o' chance dya think you've got?"

Fried (visiting hospital patient): "Do you know, old man, that's a jolly pretty nurse you've got."

Patient—"I hadn't noticed."

Fried—"Good Lord, I had no idea you were so ill!"

REASON SASKATCHEWAN IMPORTS POTATOES

Home Grown Product Below Average Grade Say Dealers

It seems difficult to credit in a fertile province like Saskatchewan that domestic sources of supply of potatoes are imported during a year. This does not happen because Saskatchewan does not produce sufficient for her own needs, but because jobbers and merchants do not view with favor the average run of the home grown product. We have it direct from those who buy them and from Dominion government vegetable inspectors, that the Saskatchewan farmer has not yet learned the way to market potatoes.

During the past year forty-one cars of potatoes were consumed in the city of Regina alone and of these ten cars only were purchased in the province, the remainder coming from Manitoba, Alberta and British Columbia. It is stated that the Chinese of British Columbia can be depended upon to put up uniform cartons of potatoes; each bag of 100 pounds is tagged and the bags are alike, so as to avoid the variety, strictly sorted "Canada B" can be ordered from British Columbia and the buyer can depend upon the order being filled. On the other hand, the Saskatchewan potatoes, such as we ourselves have seen imported in Regina, may be described as "miserable," blotchy and white, small, and large bags, and a tag that may with difficulty be deciphered.

While we should be careful to the production of "A" class potatoes, the grade known as "Canada B" is easily within reach of any grower interested in raising potatoes and is as follows: "Canada B" quality, which shall include only reasonably mature potatoes of similar variety characteristics which are practically free from dirt or other foreign matter, frost free, and not rot, and which are free from any disease caused by sunburn, rot, scab, blight, dry rot or other means. The diameter of potatoes of this grade shall not be less than one and one-half inches.

Our agricultural societies could, no doubt, awaken interest in this subject by the issue of good seed, careful production, and improved marketing methods and in this latter sphere, the Provincial Department of Agriculture, through the Co-operative and Markets Branch, would assist. At one future time potato growers in the province may have their own association or their own pool, but just now it would appear that an effort should be made to secure a reliable product on the market.—Moore Jay Times.

Using Our Spare Time

People Have Not Yet Learned the

The fact there is considerable unemployment during prosperous times seems simply that through improved methods of production and more time for play, but have not yet learned how to use it. When three-fourths of the people can do all the work that needs to be done in the country, it means that all of the people are in position to work one-fourth of the time they did, but somehow the leisure isn't divided up evenly. Some are out of work, some do so little that they might be classed among the idle, and others are still determined to work from sun to sun. The human element just to keep conditions from being perfect.

People are a better shape to be happy than ever before, if we only had a manager to tell us how to go about it.

A Synthetic Diet

Dr. Alfred M. Menzies, that one-day synthetic food and drink will be made by chemists in factories. There will be no need to till the soil, to breed cattle, to brew beer, to distill whiskey, or to import wine. We will break down tablets and eat or swallow. Already synthetic vitamins are being prescribed by doctors in the form of pills. We can chew sunlight and manufacture sunshine. But we shiver at the prospect of a laboratory race of man. A synthetic diet is fit only for Robots.

The Beauty Of Red Pine

The red pine is one of the most beautiful trees in Canada for ornamental planting. Its great masses of long, dark-green, closely-lashed needles contrast strikingly with the reddish colour of the bark on the straight ragged trunk. It is a splendid tree for drives, borders, and hedges of large groups.

The Royal sceptre of Great Britain contains the largest cut diamond in the world.

Lady—"Is this milk fresh?"

Milkman—"Art 'n' hour ago, madam, it was grass."

ALMOST PAY FOR THEMSELVES

Use Of Fingerprint System Saves Time And Money

In real life New Scotland Yard is a little more astute than its detective stories, where the lawyer lays odds his brief and the doctor his stethoscope to beat the inspector at their own game. The authorities at the Yard, for instance, are making fingerprints almost pay for themselves, something that the amateur detective can do only by writing or novel in competition with the great Fletcher family.

Records of fingerprints were first made by Scotland Yard in July, 1901. In 1902 almost 7,000 searches, comparisons were made and more than 1,700 fingerprints identified. Last year more than 25,000 searches were made, and more than 17,000 fingerprints identified. A recent manual issued by Scotland Yard goes on to say:

"The number of recognitions effected is not the only test by which the advantages of the system can be estimated. It is the marked saving of time of police officers. On a moderate computation the money value of the saving thus effected is about £100,000. The cost of the system for working the method and all incidental expenses."

Scotland Yard has on the 420,000 fingerprint slips. The slips of men known to be dead and the slips of men believed to be too old to commit further crimes, are being removed from the collection. The English police expect the collection to reach its greatest size, the purpose of the official identification within the next few years and thereafter to remain at about the same level. When that time comes it will mean that the fingerprint system has been completely assimilated and is no longer a newcomer or an appreciated helper of the law.

Tailing The Lambs

Operation Should Be Performed At The Age Of Eight Or Ten Days

It is not unusual to find amongst the members of Boys' and Girls' Sheep Clubs an over-keenness towards the seeming cruelty of removing the tails of the young lambs, with the result that the tailing process is put off for perhaps a month after it should be done. By this time the tails have grown stout and the lambs more difficult to handle, and when the operation has finally to be undertaken the surgery assumes a more troublesome aspect. At a shearing contest held jointly by the Federal and Provincial Department of Agriculture for the Middlesex County Boys' and Girls' Sheep Clubs the lambs of the flock were used for a tailing and wethering demonstration. The operations were three or four weeks overdue and provided an impressive lesson on the importance of removing these appendages at the proper age. The older lambs had to have their tails tightly corded close to the body to prevent bleeding, and when released after the operation many of them showed evidence of shock and illness. The lambs would have to be treated for a few days to hasten the healing process. The lesson decided many of the young shepherds to do the necessary surgery at the age of eight or ten days, when the tail is slender, bleeds very little when removed, and gives the lamb very little shock.

The Arctic Circle is the only place in the world exempt from lightning and thunder.

Ireland's new postal cards are printed in both Irish and English.

Four Western Canadian Universities Have Assets Valued At \$15,282,875

The total assets of Canada's 29 universities are placed at \$17,697,000. Nearly one-third of this total is held by McGill University, Montreal founded in 1821. McGill's assets are given as \$3,124,100, while the University of Toronto is valued at \$1,919,749.98 in investments and \$8,383,570 in lands, buildings and equipment.

The four universities in Western Canada have total assets valued at \$1,592,875.

While about 38 per cent of the 42,546 students attending the 23 Canadian universities are women, only about nine per cent of the 4,283 professors on the teaching staffs are of the fair sex.

Brown: "Yes, I have met your wife. In fact, I knew her before you married her."

Jones: "Ah, that's where you had the advantage of me—I didn't!"

102,000 Play "Langara"

The Club House of the famous

of the leading Pacific Coast professional champion of the U.S.A., who rates the course in the first light.

On it was played last year the first Pacific Coast Newspaperman's Golf Tournament which has ever taken place at Vancouver. The attendance exceeded 50, and competitors came from all parts of the coast.

Langara is 3,450 yards in length and has a par of 72.

Value Of Farm Production

Average Production Values Per Farm In Three Western Provinces

Placed At \$3,333

The total value of the farm production in Manitoba, Saskatchewan and Alberta in 1927 according to a recent compilation is placed at \$802,307,699, which represents an average value per farm of \$3,333. Agricultural products in these three provinces marketed last year had a value of \$912,885,044, an average cash income per farm home of \$2,469. Wheat headed the list in the value of farm products with \$407,098,000 with a total production of 414,919,900 bushels. Next came other grains with \$164,924,800 bushels valued at \$184,901,300; root crops \$178,600,000 valued at \$194,600,000; fodder crops \$173,300,000 valued at \$208,800,000; dairy products, \$154,496,313; animals sold and slaughtered, \$10,870,999; poultry and poultry products, \$28,140,017; garden products, \$7,816,000; fur, \$4,464,000; honey, \$1,273,002; wool clip, \$44,467,000.

By province the value of farm production in 1927 is given as: Saskatchewan, \$348,183,292; Alberta, \$223,558,279; Manitoba, \$154,566,119.

Hungary is to have a college for policemen. The course will be four years. For entrance a high school education will be necessary.

Don't think it isn't better late than never that it isn't better never late.

The Cave Dwellers? "I'll go with you, well, we will have a lift put in next year."—Guerin Maschino, Milan.

Station Within Arctic Circle

Murmansk, Russia, Is Most Northernly Spot Reached By Road

Polymastik Krug, which is Russian for polar circle, is on latitude 66° 32', 33 minutes north, just where the Arctic begins. That is why it is the name of a railroad station. This railroad had to cross the Arctic circle somewhere, which gave the definite location of a station, now grown to a village of two log houses and a larger structure, also of logs, which holds the co-operative store and room upstairs for the manager's family.

One place seems as good as another for stations in the wind-swept wastes of tundra and scrub plus. This is one where name and place were predetermined. If not historical, it has geographical fame—in fact, world distinction. There cannot be more than one, possibly in Sweden, on the Arctic circle. The station is the only one that is its inhabitants can tell just where he lives in parance of degrees and minutes. Probably few more than that in cities gathered in millions can say as much.

More stations, an average of one for every five miles—clusters of a few miles but buried in snow, or a small band of family with a religious team which has come for support from the tundra waste beyond—follow until Murmansk is reached, 147 miles within the Arctic circle, and the world's northernmost spot on the railway. Murmansk is at latitude 68° 09', 09 minutes, only 144 miles south of Point Barrow, the most northerly point of the United States.

A new harbor is being built in Murmansk, for in a future red war it may be useful as a base for naval operations.

YOUTH NOT HAPPIEST AGE

Peace Of Mind Comes With Acceptance Of Facts Of Life

There are few of us who in our sentimental moments, do not think we would like to have time turn backward in its flight and make us boys and girls once again. Eugene Field, carrying with him the spirit of youth to the day of his death, wrote:

"I'd like to sleep where I used to sleep."

When I was a boy—a little boy."

We forgot that when we children were not quite so happy as we think we were. The schoolmaster and the childhood are exceedingly real. The worries and anxieties of boyhood and girlhood are as real and as appalling as any that are to come.

Looking backward life seems like a long summer afternoon in those golden days, and it seems like a long summer afternoon at rest with the consciousness of work done as well as we know how, the chance for happiness today is no good for any of us as it was in childhood.

Age is the happiest period of all. Age is not a failure. A day of age is free from worries and anxieties of any other period. The first of ambition no longer consumes us. The fading of the passions does the loss of faith, and cynicism. Rather age may bring merely a clearer, more honest acceptance of the facts of life. And that is always the way to peace of mind.

Do not fear age. Look forward to it with comfort.—Grove Flanderson.

Exchange Of Facilities In Under Construction

Ways and means for working out an exchange of facilities between the Alberta Government telephone system and the telegraph companies are at present under consideration and a conference in connection with the matter was held recently between W. D. Robb, vice-president of the Canadian National Railways, and R. B. Baxter, deputy minister of telegraphs.

Mr. Robb is referring to the question to the head office of the C.N.R. telegraphs and it is likely that a working agreement will result.

Under the proposed plan the wires of the provincial telephone system will be made use of by the telegraph company, in certain parts of the province, for the transmission of telegraphic messages, while the privilege of using telegraph lines for transmitting telephone messages will be accorded in other cases, by way of exchange. A similar arrangement in some parts of the province is already existing between the telephone service and the C.P.R. telegraphs.

Just Select Samples

Farmer John Giles sent his young-est son into the miller's with a sample of his crop of wheat.

"This is splendid wheat young man," he murmured to the farmer's son. "I'd like to buy it from your father. How much has he got like this, do you think?"

"Not much," said the boy, "he spent all the morning picking that out."

Grain Shipments To Vancouver

Over 600,000 bushels of grain have been shipped by Calgary to Vancouver since the beginning of the 1927 crop season, so local inspections show this about double the quantity shipped in the corresponding period of the preceding season and is by that much an increase over the previous record.

The Case Dwellers? "I'll go with you, well, we will have a lift put in next year."—Guerin Maschino, Milan.

"How do you manage to remember so many things, Sarah?" inquired the mistress of her household. Then Sarah made reply with the infallible rule for memory training.

"I'll tell you, ma'am," said she. "All

my life I've never told a lie. And when ye don't have to be exact, ye memory, or be rememberin' what ye told this one or that one, or how ye explained this or that, ye don't overwork it, and it'll last ye good as new, for ever."

the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. All this kills acid instantly. The best form is Phillips' Milk of Magnesia, because two harmless, tasteless doses neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

CHAPTER XXVI.—Continued

When they were in the car, Maude finished the conversation. "Helm is doing well, but don't fuss her up by taking her out. They get to know too much. Now Mrs. Bell when she spoke to me said I would have to get some one to wash. Helm wouldn't be able to do the washing, especially hanging out of the clothes, on account of nursing her baby—she might catch cold. But Bob, she does it and washes beautifully. I just kept going. We're saving two dollars a week there. Now girls that! Am I a good wife for a poor man? I'll say I am. These foreign girls are strong as horses. Well, she's good to the baby anyway, but don't spoil her, for Heaven's sake. The more you do for people the more they expect—take it from me!"

"To witness Mr. Herriott repeat: 'I bet she's like a ride, though; she's only a kid. She's younger than you, and I think she looks pretty pale and tired sometimes.'"

"Lost here. I see his plump little wife, asserting her dignity. "Who's asserting the house?"

"And when she said it she looked so utterly sweet and plump and pink and white; so much like a spoiled but very pretty child, that her husband kissed her and forgot all about Helm."

Helm had a friend in the broad man, who gave her snatches of news from the outside world. The soldiers from out at the Exhibition Grounds were going away. They would go direct to England, to Salisbury.

How Much Water Should Baby Get?

A Famous Authority's Rule
By Ruth Britton

Baby specialists agree nowadays that during the first six months of life there must be three ounces of fluid per pound of body weight daily. If the child must have, for instance, need twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a baby's body is determined by weighing him before and after feeding. In the first day and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish crying, soothes his restless fussing, and gives him a few drops of Fluoridol.

For these and other ills of babies and children such as colic, cholera, diarrhoea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, finding out why there's nothing so effective as Fluoridol.

Fluoridol is a purely vegetable recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from the food, and keeps his little body as he should. With each package you get a book on Motherhood worth its weight.

Just a word of caution. Look for the signature of Chas. E. Plummer on the package so you'll be sure to get the genuine. The other bottles contain thirty-five doses.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Do prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any drugstore.

Plains. His boy was with them—"as good a boy as ever stepped." But he had been in South Africa for a long time. "War—wasn't a chap of the old block."

"War—wasn't a chap of the old block."

"War—wasn't a chap of the old block."

Helm was not unhappy, she had pleasure in her work and in caring for little Lili, who grew lovelier every day. The Herriott baby was a heavy, portly child, but she loved him profoundly. "Has she taken it yet?" the grandmother asked, each time she came.

From her room, Helm could look north to the railway tracks and see the Peace River train come in as it whistled. Helm was sure to see it along, like a square, black painted snake, she found herself watching for it every Tuesday and Saturday.

"One night in April, when Mr. and Mrs. Herriott were away to a dance, the soldier baby grew suddenly ill. The usual symptoms, little hot hands, feverish breath and restless tossing head. Helm was walking the floor with him when the parents came in at two o'clock in the morning.

"'Lay him down and let him cry,' said the doctor. Helm did as he was told. The baby lay on the dining-table. 'It's his cold! All kids have it; you're spoiling him.'"

"You'd better send for the doctor," said Helm. "So how red he is—I'm afraid of tuberculosis," the red fever.

"Nonsense!" Maude Herriott had just come from "The Macdonalds." So she said very dryly, and the exclamation of it was still in her brain. The idea of this Flim girl saying the doctor should be brought! Helm was frightened. The baby's eyes were burning and rolled uncertainly, and the night was heavy with the sudden heat of spring. "Please do send a doctor," Mrs. Herriott said. "It's bad, this sudden sickness, sometimes it brings on convulsions and babies die."

Mrs. Herriott took another look at the baby and felt his head and his hands. "Oh, he's all right—his head's a little hot, but his hands are cool—feel!"

The finger tips were cold. "Well, I am going to bed. I've had a hard day, and there's a doctor to-morrow. I don't see that there's any sense running up a bill with a doctor when there's no need. All kids get sick sometimes, and the less notice you take of them the better."

The next day Lili grew hot and restless, and Helm sent for a doctor. In three days the doctor declared it to be scarlet fever, and the Herriotts decided that both children should go to the Isolation Hospital.

"Let me stay, and keep them!" pleaded Helm. "I can't leave my baby go. My wife fret for me. I will die among strangers. Please Mrs. Herriott, let me stay. I will work for you for a year—for five years—for nothing—if you let me stay here and keep her. And I will nurse Lili too. I'll leave her feeding herself from side to side in her nursing."

Mrs. Herriott did not hesitate a moment. "No, Helm, we can't do that. They'll be all right in the hospital—it's the right place."

"But my little Lili will die! I nurse my Lili."

"Well, you'll have to learn her to look after that. I can't help away, so don't stare at me."

Helm sprang to her feet and shook her mistress fiercely.

"I care! I love my baby, you can't love yours. You can send yours to the hospital. My little Lili dies if I do. Let me keep both, please, please!"

Mrs. Herriott said, "You'll have to nurse, now, listen, they are both going. I guess if the Isolation Hospital is good enough for Roland Herriott it

will do for Lili, so cut out all the fireworks and get ready."

Thump and pink and white, with a baby smile, was Maude Herriott, the petted child and wife, but hard and cruel as any toothless old crane.

His eyes were full of indignance to the hospital, and, strangely enough, it was Mrs. Herriott who became hysterical when the nurse took her baby from her.

The brown-eyed nurse who had received Lili read the misery in Helm's eyes, and, perhaps her sympathy kindly, "I do not think your baby will have it very hard—she is a lovely little thing and looks quite strong. Don't worry her, because we will have splendid nurses with our babies here. She will have every care, I promise you. No, she will not fret much."

Helm kissed her hand with a soft look in her eyes, but she could not speak. Her heart would have broken when she saw Lili carried into the fever ward—away from her, with a nurse's hand on her forehead. The gentle touch of the nurse's hand had not been laid on her shoulder. The hand was warm, human and strong, and she looked at her with her eyes wide, but pale, and tight-lipped and, but, and tearless. The red cross on the frosted glass of the ambulance door held her eyes with a spell of fascination; to her excited imagination it seemed as if it were painted with blood.

When returning it was pointed out at First Street by the closing of the black and white gates, for the ambulance train was going out, a red cross carrying the soldiers. The station platform swarmed with people, and a band played his music. Helm, startled by the sound of the music, saw a hand held in the world and her Lili so sick? Helm was sure to see it along, like a square, black painted snake, she found herself watching for it every Tuesday and Saturday.

Telexes Can Talk Back

Improved Mechanical Man Now Does Everything But Eat

A further step has been taken in the development of the mechanical man. Formerly it could do nothing but hear and obey. Now it can talk back.

The mechanical man, or Telex, was hailed as the perfect employee when it was first invented by R. J. Wensley of the Westinghouse Electric and Manufacturing Company, because it could obey orders and do nothing else. It was even spoken when spoken to. When the inventor has endowed it with words, when it is hailed over the telephone it responds in a well-modulated and deferential voice.

"Telex speaking."

It can even initiate a conversation. If something goes wrong, for instance, at a power substation where the Telex is on duty it can lift the receiver and say:

"This is the Telex calling for main 500."

When "Telex" is connected with that number the conversation will continue in buzzer code. The man at the substation, by an interlocking system, will be warned of the Telex's reply in the same form—one, two, three buzzes or a combination of buzzes, each meaning something different.

In place of vocal chords the mechanical man has a talking drum introduced as an organ. The words to be spoken are recorded by photography on a film and introduced into the physiology of the man that was born in a laboratory.

New Industry For Palestine

Bananas and Oranges Of Superior Quality Are Being Exported

Oranges and bananas will be the commercial salvation of Palestine, and the industry fostered by the measure by capital of Canadian Jews, is already firmly established. The famous Euphrates fruit from California growers, Sidney Pierce, of Montreal, says on his return from a four-months' tour of the Holy Land. He secured the help of his father, Arthur, former fur wholesaler, who is putting his energy behind a large export scheme.

American experts such as Messrs. Hyerson and Howell, rate the Palestine orange as greatly superior to the California product. Mr. Pierce says the fruit is half as big again as the best California orange, and of good flavor and travels well when packed. So far, exports are around 1,500,000 boxes annually, with English taking all of the fruit shipped. Germany, however, is coming to the fore as a customer.

Plans Difficult Climb

Mount McKinley Peak Is Objective Of "Superintendent"

An attempt to climb Mount McKinley, the highest point in North America, will be made this summer by Harry Harlow, superintendent of Mount McKinley National Park, Alaska.

The department of the Interior has authorized the attempt to be made in the interest of science to determine whether the Alaska peak is the coldest spot on earth.

Karsten, who climbed the peak with a party of three in 1913, plans to recover a recording thermometer he left on his previous ascent. The mountain is 20,900 feet high.

Three-In-One Machine

Tourists of the future will be able to use the same conveyance for travel by land, water or air if a British craft, recently exhibited, proves successful. It is a combination automobile, motorboat and aeroplane, which will fold back, take, and under and over. It has a motor cabin holds several passengers and little time is needed to change the vehicle for different modes of travel.

If an employee never pretends to be busy when he has nothing to do he is trustworthy.

Of course the fittest survive, as Darwin said. We're all here, aren't we?

Athletes.

For sprained ligaments, bound muscles, blisters and bruises—

MINARD'S
"KING OF PAIN"

For sprained ligaments, bound muscles, blisters and bruises—

When Capt. Malcolm Campbell completed his world-record automobile drive at Daytona Beach, his first remark was for a cup of "good, strong tea. (The courageous Captain would have enjoyed Red Kona Tea because it blends of choicest Asam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Try it for your grocer in clean, bright a lums in my packages.

Dog Discovers Valuable Mine

Strange Incidents Recalled In Connection With Mineral Discoveries

One of the richest copper strikes on Vancouver Island was made by a dog, according to Harry Tanno, a Vancouver mining man, who has been disbeliever in a prospecting trip.

Tanno's dog was a companion on one of his last seasons to rival his master in the discovery of "float." One day on the West coast of Vancouver Island, Tanno heard his dog barking persistently and went to see what it was all about. To his astonishment he found the dog scratching around a rich outcrop of copper ore.

The dog was persistent in his search for the ore, and when Tanno saw the dog's paw prints on the ore, he was convinced that the dog was right. He then dug out the ore and found it to be a rich outcrop of copper ore.

Teeth and Health

Green's Tooth Paste
By The Macdonald Dental

GREENSTAIN

You are anxious that your child should have nice white teeth, and you are endeavoring to get him to form the habit of brushing his teeth with tooth paste. (The courageous Captain would have enjoyed Red Kona Tea because it blends of choicest Asam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Try it for your grocer in clean, bright a lums in my packages.

When you notice a dark greenish stain on his teeth right next to the gum, and which persists in spite of careful brushing.

This, then, is "greenstain," and is commonly found on both the temporary and permanent teeth of children. Greenstain generally confined to the interior upper teeth, well up towards the gums.

The greenish color is due to bacteria present which find lodgment in the spaces between the teeth, and of a dead outline which often persists after the eruption of the tooth.

Where "greenstain" is permitted to remain for a considerable time (upon these surfaces, the enamel will be found to be "etched" or roughened by the bacteria, and will be rich in bacteria produce. Unfortunately this injury to the tooth substance is permanent.

Now, you can readily understand that if the bacteria are not to rival food particles and epithelial matter are as found in a mouth where brushing is neglected.

One of the richest copper strikes on Vancouver Island was made by a dog, according to Harry Tanno, a Vancouver mining man, who has been disbeliever in a prospecting trip.

Tanno's dog was a companion on one of his last seasons to rival his master in the discovery of "float." One day on the West coast of Vancouver Island, Tanno heard his dog barking persistently and went to see what it was all about. To his astonishment he found the dog scratching around a rich outcrop of copper ore.

The dog was persistent in his search for the ore, and when Tanno saw the dog's paw prints on the ore, he was convinced that the dog was right. He then dug out the ore and found it to be a rich outcrop of copper ore.

Duchess News

DUCHESSE, June 28.—Mr. and Mrs. M. CRAIG, of Spokane, Wash., are visiting in Penticton this week, and will return to attend the stampede on the 4th of July.

A number of citizens are busy getting the sports ground ready for the Fourth.

Mrs. Galbraith is moving to Brooks this week.

Those who went fishing at Lake Newell Tuesday were: Carl Saliers, Cecil Saliers, Emil Clousa, and Harry Gahan. They report a good haul, but only six fish caught.

If H. Spicer leaves Monday for the postmasters' convention in Calgary.

Mr. and Mrs. Burdick, of Patricia, have moved here and opened up a barber shop and beauty parlor in the Patsell building.

A special meeting of the W. L. was held at the home of the president, Mrs. Anderson, on Wednesday night to make final arrangements for the supper to be given on sports day in the building formerly occupied by the Chow Cafe.

M. Root went to Medicine Hat Saturday night, returning Tuesday, bringing Mrs. Root back with him.

H. D. Powers, eyeglass specialist, will be in Penticton Thursday, July 5.

HEALTHFUL CAMPING

It is the merry month of June. The roads have dried out. The trees are green and the wild flowers are a riot of color. The car has been given its spring clean and overhaul, and is humming along hitting on all cylinders; the net result being that the human family has become infected by the holiday fever and plans are going ahead for vacations here, there, and everywhere. Just a few words of warning to those lucky people who are going camping. In the home—sanitary, hygienic, and public health measures are regularly carried out, both by the individual and by the health department. On the motor trip the situation changes. The entire responsibility of health protection is assumed by the tourist, therefore the traveller should be familiar with every precautionary measure.

The tourist should learn to distinguish the right kind of place from which to buy food. Food protected from dust, dirt and flies and prepared by clean hands is health insurance for the camper. He should see that his gear is clean. He should not drink water from brooks, lakes, springs, and etc., which are not known to be free from infection. It is easy to boil water over the camp fire. It is the only safe procedure when there is no certainty of purity. Clear, sparkling water is not necessarily safe.

Milk is a fine food, but is very easily contaminated. Raw milk should be boiled before using. The milk problem is one reason why babies and small children should not be members of a camping party. They are better off at home. Destroy all garbage—bury deep or burn, and so keep away flies, those most carriers of disease. For those who would sleep out, comfortable sleeping equipment should include mosquito netting, otherwise well, no tent, but a camper, spoiled trip. Prevention is better than cure and the sensible tourist will safeguard himself and his family against such diseases as typhoid, dysentery, and small pox by correct immunization before starting. Better be safe than sorry. Just one last word—"Do unto others as you would be done by." Make that the rule of the road and the camp, and nothing but pleasant memories of an ideal holiday will result. The Red Cross with its free "Health Package Library" is at the service of every one.

Her: "You must economize. Think of the future. If I were to die where would you be?"
She: "I should be here all right. The question is—where would you be?"
